# MyHPB2020

## About MyHPBS

The dedication and commitment of our pioneers in Hepato-Pancreato-Biliary (HPB) Surgery has propelled the interest and practice of HPB surgery forward nationally. Advancement in this field of subspecialty has also seen the practice gained popularity and expanded over the past decades. The HPB fraternity has been actively organizing activities such as workshops, symposiums and other educational activities to promote their subspecialty and encouraging young surgeons embarking on this journey. To further assist the development of the HPB fraternity and facilitate future HPB related activities, The Malaysian Society of Hepato-Pancreato-Biliary Surgeon (MyHPBS) was collectively formed and registered in August 2019.

The objectives of the Society are to conduct educational and social activities related to the field of HPB Surgery as well as to assist the development of its subspecialty in Malaysia. It also serves as a platform for the HPB fraternity to share information and experience with each other, as well as a melting pot for surgeons, physicians and allied healthcare worker to come together in advancing the field of Hepato-Pancreato-Biliary (HPB) Surgery.
